

Draining The Spa Supplement | XS Series

Draining The Spa for XS Series

Detail of XS Series drain

We recommend that you drain and clean your spa no less than 3 or 4 times per year, depending on how frequently you use it and how well you maintain your water. In most cases this simple process will only take about an hour to accomplish.

Drain Location:

The drain is located in the center of the Dura Floor directly under the topside control panel. This is the innermost closed position.

Step 1: Remove Cap

Using your hand, unscrew the cap to the drain.

Step 2: Attach Hose

Screw on a garden hose. Place the other end of the hose in the area you want the water to drain to.

Step 3: Open Drain

With the hose attached, turn the round portion of the drain counterclockwise until it stops, then gently pull the round portion (with hose attached) out until you hear a click (approx 1/4").

Step 4: Close Drain

When you are done draining your spa, reverse these steps to close the drain (step 3), remove the hose (step 2), screw on the cap (step 1).
