

CARING FOR YOUR HARDCOVER

- 1) Consistent use of the blue floating blanket (liner) is essential. It must be cut to the **outer** perimeter of the spa (NOT the inner water line). This will act as a barrier between the water and your hardcover and will provide added insulation. The hardcover will hold the liner in place.
- 2) Make sure to leave the cover off the spa for 1 hour after adding any chemicals.
- 3) Use Cover Care and Conditioner formula monthly according to the directions on the bottle.
