

in.clear Salt System

Salt System – clean water done right

9.21.12

in.clear Salt System

(by Gecko)

Clearwater Spas now also carries a second salt system. **Introducing in.clear by Gecko.** This system is now available and can be ordered on all Clearwater Spas Series – Resort, Beachcraft and XS.

Easy to use and built to last, the in.clear is one of the most efficient water sanitation systems offered to the spa and hot tub industry today. Spas using the in.clear system need very little maintenance.

In.clear generates and releases bromine into the spa water, rapidly destroying any microbiological contaminants such as waterborne bacteria, algae, and organic matter given off by spa bathers.

The in.clear system eliminates the need to add bromine or chlorine to your spa on a regular basis. The in.clear system does not produce any offensive odors, it does not cause eye irritation and it's easy to use, making it the best choice for hot tub sanitization.

With in.clear, even if your schedule takes you away from your hot tub for weeks, you'll still enjoy a clean and clear spa when you return. While you're away the system will continue to generate the perfect amount of bromine, based on the setting you select.
